TRUEVIEW™
HIGH DEFINITION LIGHTING

**NO CORD HAZARDS / NO SEARCHING FOR POWER SOURCE / NO EXTRA COSTS OF
RUNNING TEMPORARY INFRASTRUCTURE / NO LOCATION LIMITS / NO PETROL**

TRUEVIEW™

1 TRUEST COLOUR ACCURACY

- True representation of colours and details
- Neutral white light for greatest clarity and comfort
- Designed to represent sunlight at 10 am or 2 pm

2 BEST-IN-CLASS BEAM PATTERN OPTICS

- Even and consistent beam pattern from edge to edge
- Accurate and efficient work environment, no hot spots or washed-out borders
- Reflectors and diffusers optimised for each light

3 REDLITHIUM™ BATTERY TECHNOLOGY

- Portable solutions
- Long lasting reliability
- System compatibility

1 TRUEST COLOUR ACCURACY

COLOUR TEMPERATURE

The colour temperature is the colour appearance of the lamp itself and the light it produces. It is measured in Kelvin (K) on a scale from 1,000 to 10,000.

Higher colour temperature numbers in Kelvin (over 5,000 K) are cooler and show a bluish light. Lower colour temperature numbers (2,700-3,000 K) are warmer or more red colours. Neutral white colour improves productivity and safety, and it is less stressful on the eyes.

TRUEVIEW™ ADVANTAGE

TRUEVIEW™ products maintain a neutral white light that offers the greatest clarity and comfort to the end-user. Designed to represent sunlight at 10am or 2pm. MILWAUKEE® uses the highest quality LED's optimised for each individual light.

COLOUR RENDERING

Colour Rendering Index (CRI) is a rating on a scale of 1 to 100 of how accurately a lamp shows coloured objects. The higher the CRI, the closer the colours look to the sun.

This can be extremely important on the job site, specifically for the colour detection of wires.

High level of colour accuracy improves productivity and safety.

POOR			AVOID			OK		GOOD	
0 CRI	10 CRI	20 CRI	30 CRI	40 CRI	50 CRI	60 CRI	70 CRI	80 CRI	90 CRI
									100 CRI

TRUEVIEW™ IS SETTING THE STANDARD IN COLOUR RENDERING

MILWAUKEE®
COLOUR RENDERING
RATING

TRUEVIEW™ products offer the end-user the ability to see colours accurately.

MILWAUKEE® uses high quality LEDS' and an optimised phosphor coating covers most of the visible spectrum.

2 BEST-IN-CLASS BEAM PATTERN OPTICS

An even Beam Pattern is consistent from the centre to the edge of the beam.

An even beam pattern allows for an accurate and efficient work environment. Hot spots and washed-out borders result in the need for constant adjustment.

Optimised for each product, reduces eye strain, improves productivity and safety.

TRUEVIEW™ ADVANTAGE

TRUEVIEW™ products offer even and consistent beam pattern across all lights that reduces glare and shadows. MILWAUKEE® uses reflectors and diffusers optimised for each product that deliver a uniform pattern.

3 REDLITHIUM™ BATTERY TECHNOLOGY

**REDLITHIUM
FORGE™**

**REDLITHIUM
FORGE™**

For when the job
demands extra

If its M18™ it fits!

Works with all MILWAUKEE®
M12™ batteries

All day run time*

*Dependent on mode
selection and based on
10 hours work day

TRUEVIEW™

HIGH DEFINITION LIGHTING

DELIVERS CONSISTENT BEAM, OPTIMISED COLOUR TEMPERATURE AND TRUE REPRESENTATION OF COLOURS & DETAILS.

BUILT TO WITHSTAND THE TOUGHEST CONDITIONS ON AND OFF THE JOBSITE.

MILWAUKEE® lights combine the best cordless battery and LED technology delivering convenient, portable solutions that increase productivity and safety. TRUEVIEW™ high definition output delivers consistent beam, optimised colour temperature and true representation of colours & details.

ALL OUR MILWAUKEE® LIGHTS ARE DESIGNED TO:

ADAPT

Industrial portable lighting TRUEVIEW™ offers professionals the ability to bring light directly to their work as well as control the beam intensity and direction for greater productivity on the jobsite.

PORTABILITY

MAGNETIC ATTACHMENT

QUICK & EASY SET UP, ADJUSTABLE HEIGHT

ROTATING AND PIVOTING HEADS FOR MAXIMUM COVERAGE

PROTECTIVE BITE ZONE

PERFORM

Through the use of high quality LEDs, MILWAUKEE® designed optics and REDLITHIUM™ battery packs, TRUEVIEW™ industrial LED lights shine brighter and last longer.

MAX. 27,000 LUMEN OUTPUT

EXTENDED RUN TIME WITH 2 BATTERY PACKS

ALL-DAY RUN TIME*

* Dependent on mode selection and based on 10 hour work day

SURVIVE

Reinforced, impact resistant housing and lenses stand up to the challenges of industrial use.

Superior temperature management protects LEDs throughout their life.
